Automation Anywhere: The Undisputed Global Leader in RPA

A pioneer of the Digital Workforce

#1 in Top 10 Robotic Process Automation (RPA) Products 2020

A Leader and Star Performer in IDP Matrix 2020 & RPA Matrix 2019

A Leader in the RPA Wave 2019 & 2020

#1 in RPA Segment Capture Market Matrix 2019 & 2020

A Leader in RPA Magic Quadrant 2019

A Leader in RPA Platforms Decision Matrix 2018 & 2019

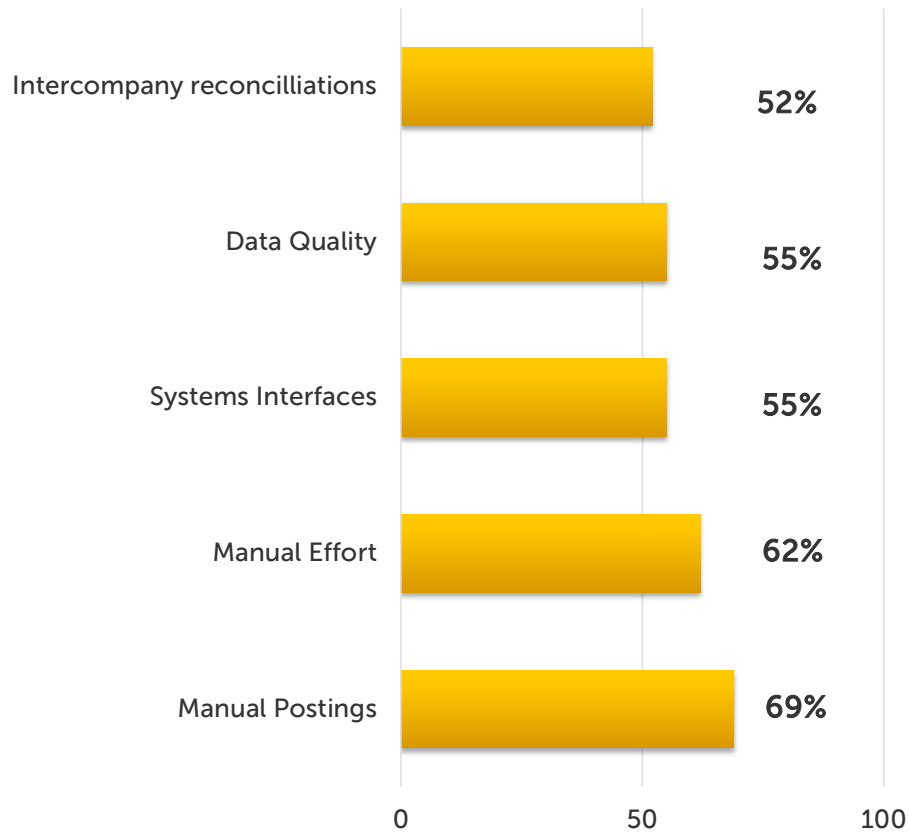

“The real problem is not whether machines think
but whether human do”

Technology: Faster Innovations, Improved Productivity

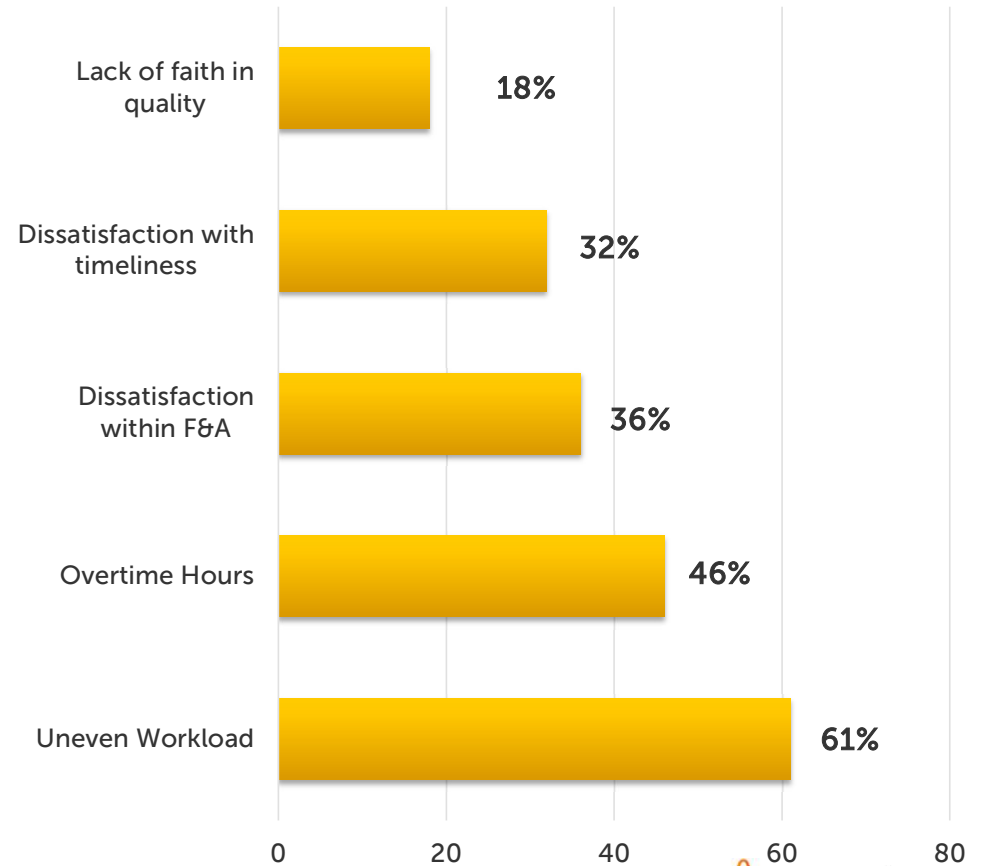

What is holding us ?

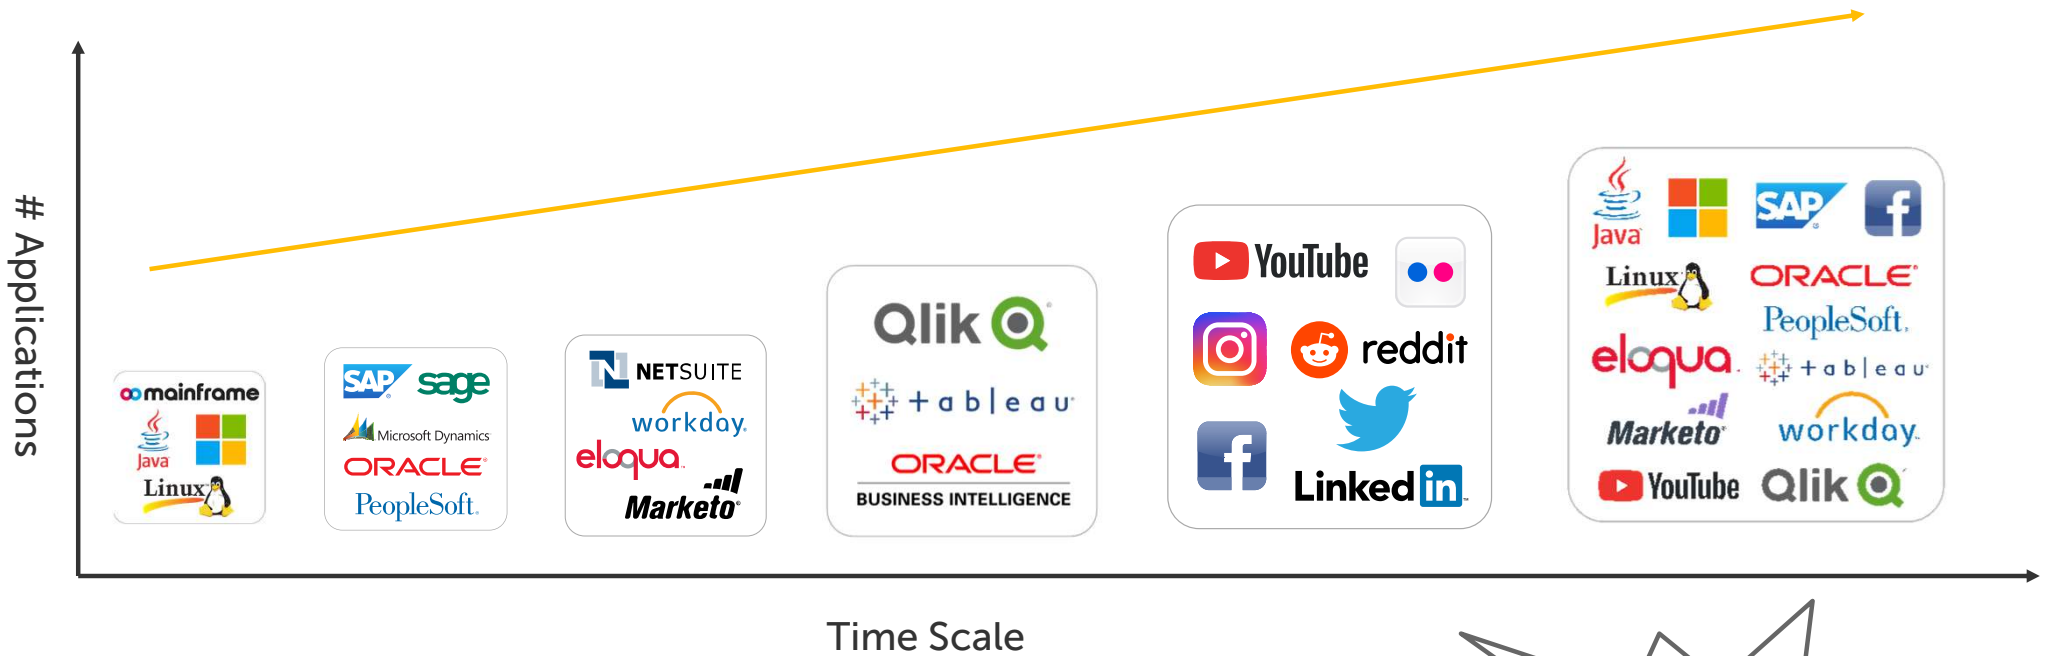

Productivity

Employee Engagement

Digital Transformation - Complexities

- # Siloed Applications Increased
- # Deployment Model Changed (On-premises, Cloud, Hybrid)
- # Consumptions of these applications
- # Data grew phenomenally (Structured, Unstructured)

Unstructured Data being handled manually = repetitive, mundane tasks for employee

80% of data is unstructured

Summarizing : Robotic Process Automation (RPA)

Robotic Process Automation is productivity software that sits on top of existing systems and performs manual, repetitive, and rule-based activities traditionally performed by individuals.

Emulates a person by executing manual, repetitive tasks in existing applications

Makes decisions based on set rules

Integrates and updates seamlessly with other applications

Finance Challenges driving the need for Digital Transformation

Finance leaders are looking for solutions to address these challenges

| Macroeconomic Pressure | Liquidity & Capital Adequacy | Expense Management | Risk & Compliance | Timely & Accurate Reporting |
|---|---|---|---|--|
|  |  |  |  |  |
| Ensure business continuity and growth during economic recession | Improve cash flow, capital adequacy, and company valuation | Transform operations, increase productivity, and reduce costs | Manage risk and ensure compliance with accounting and regulatory standards | Strengthen governance and controls to produce timely, error-free financial reporting |

CFO Top Priorities for 2020 & beyond

What is top of mind for Finance leaders today

RPA is Well Positioned to Address Top Finance Priorities

Strengthen Controls

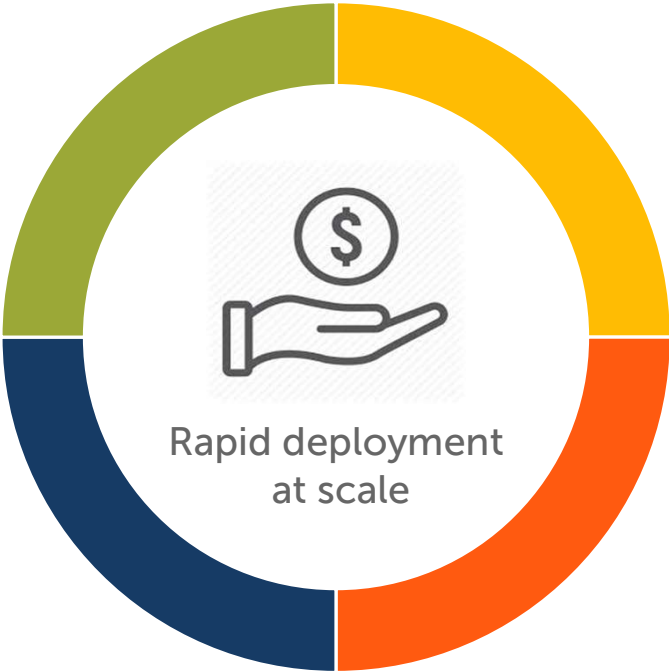

Tighten governance to improve reporting accuracy and compliance

*Achieve 100% accuracy with automation**

Increase Productivity

Automate manual processes; free-up capacity to focus on more value-added analysis

*AR automation alone can result in 33% reduction in manual labor**

Improve Cashflow

Streamline accounts receivable and accounts payable processing

2-6 day reduction in days sales outstanding

Accelerate Reporting

Improve timeliness of financial reporting and forecasting

*Less than 6 months to automate financial processes end-to-end**

* Based on customer results

Digital Workforce

When human and digital workers work side-by-side, amazing things happen

Typical Use Cases

Automating Finance Processes End-to-End

Record-to-Report / Financial Operations

- General ledger close
- Reconciliations
- Manual journal entries
- Intercompany settlements
- Fixed asset management
- Regulatory & external reporting

Procure-to-Pay / Accounts Payable

- New vendor setup
- Purchase order creation
- Invoice validation
- Invoice and lease payments
- Travel and expense reimbursements
- Payables reporting

Order-to-Cash / Accounts Receivable

- New customer setup
- Sales order processing
- Invoice creation
- Collections
- Payment processing
- Receivables reporting

Treasury Operations

- Consolidated cash position reporting
- Bank and financial statement consolidation
- Cashflow forecasting
- FX volatility and hedge future risks management

Tax Operations

- Tax provisioning
- Tax compliance
- Tax accounting
- Data management & reconciliation

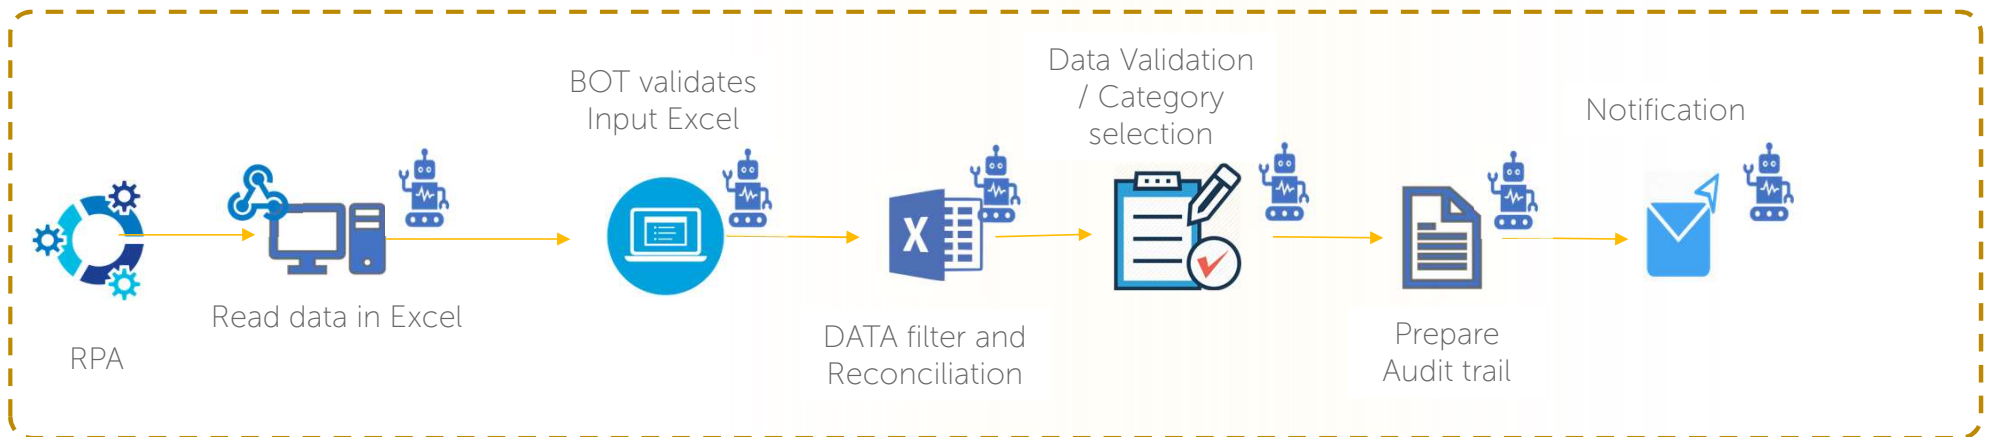

Financial Planning & Analysis

- Budgeting
- Forecasting
- Variance analysis
- Management reporting

GSTN Reconciliation for Unmatched Invoices

- **Input Excel:** Reconciliation sample data.xlsx (Sheets: "Purchaser Only" and "Supplier Only")
- **Reconciliation Checks:** Counter Party-Tax Payer GSTIN Mismatch, Invoice Number, Tax Amount Mismatch, Tax Structure Mismatch
- **Fields Covered:** GSTIN / UIN of Counterparty (string with PAN), Invoice Number, Invoice Date (Optional), Invoice Amount (CGST and SGST), to check for variation of 1% or INR 100 whichever is less is allowed

Use of Automation in Finance

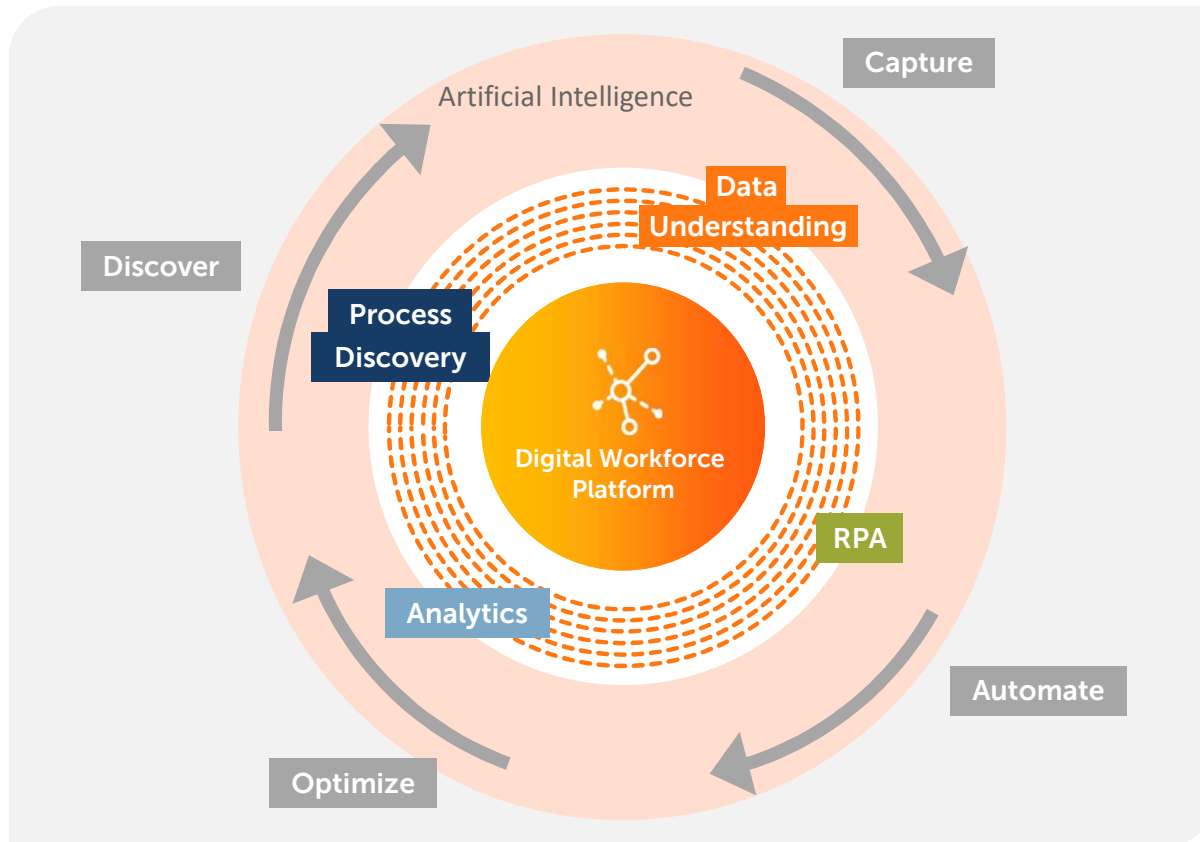

Use RPA to:

- Accelerate financial close process
- Automate reconciliations & intercompany settlements
- Streamline accounts payable & invoice processing
- Enhance fraud detection
- Improve accuracy of regulatory reporting
- Consolidate & validate data from legacy systems

With RPA you can achieve cutting-edge results:

- Substantial reduction in processing cost and delivery time
- Quick access to multiple data feeds and analytics
- Error-free operations and reporting

What you achieve ?

 Fast ROI and business value

- Business resiliency
- Labor optimization
- Faster cycle times
- Customer experience
- Employee productivity
- Compliance and security

What does it take?

PEOPLE

The Future of Finance

- 1. The Finance factory** - Transactions will be touchless as automation will reach deeper into finance operations.
- 2. The role of Finance** - With operations largely automated, Finance will double down on business insights and service.
- 3. Finance cycles** - Finance goes real time. Periodic reporting will no longer drive operations and decisions—if it ever did
- 4. Operating models** - New service-delivery models will emerge as robots and algorithms join a more diverse finance workforce

How to get started?

1. Login to **free Community Edition** of Automation Anywhere's RPA as a Service
2. Learn to build your bots - Free training resources available on **Automation Anywhere University**
3. Purchase **SaaS or On-Premise** License from Automation Anywhere
4. Build your own bots or Purchase Bots from Automation Anywhere **Bot Store** and deploy
5. Analyze your bot performance using **Bot Insight**

A black and white photograph of a hand holding a tennis racket. The hand is positioned in the center-right of the frame, with the fingers wrapped around the handle. The racket head is visible, showing the strings. The background is a blurred outdoor setting, possibly a tennis court, with a fence or railing visible. The overall tone is motivational and focused.

Go be great.
